K-FLOAT

Founded in 1998 by a group of experts in above-ground storage Tank (AST) engineering and construction field, K-Float has been the symbol of "The supreme excellence in quality and service" for it is uniquely designed various Floating Roofs and Seal Systems through-out domestic and overseas market. Following the lead by Y.K.Cho, President/Cho, whose personal experience of 15 years in designing and manufacturing of VOC control system, K-Float's engineering staffs are at customer's disposal year-around to meet their needs from every corner of the world. Now in its second decade of existence, K-Float has the experience and resources to have developed a vast reservoir of design understanding, chemical knowledge, and manufacturing "Know-How" of Internal Floating Roof and Tank Seal System for all environmental circumstances.

Our customer base ranges from hot-dry Middle East region to wet South East Asia and North & South American continent. In order to meet this enormous challenge of task servicing customers all over the world, K-Float has been re-investing a decade of its annual revenue back to research and development of design renovation to meet particular regional requirements and peripheral parts up-grading as well as refining the manufacturing process with economics in mind. When called upon, K-Float engineering staff will analyze customer's unique needs and demands and offer the best possible solution along with K-Float's technology to its fullest.

K-Float, firmly believe our profit comes from customer's profit which is our top priority of all. Based on this belief, we put our best efforts in reducing the cost of product, but without negotiating the level of quality. K-Float employs 'Zero Tolerance' policy in quality control on all of our products that leaves our plant. We not only send our product to customers but also our sweat and soul along with it wherever it may be.

When you call on us, please bear in mind, "Unless you are satisfied, we are not satisfied".

Best regards,

YOUNG KUK, CHO
PRESIDENT
